ARCHISTART

Archihacker2019

intro

Archistart promotes **ArchiHackers Competition**, a contest to reward young designers creativity and talent.

Do you have a favourite architecture? Do you remember how many architectural design references you met during your academic studies? **ArchiHackers** is an invitation to hack an architecture, transforming, multiplying or simplifying it.

At a time when transformation, expansion of buildings, regeneration and construction on the built are turning more and more important, the contest is an invitation to experiment with your own idea of architecture, to confront your own design references, enhancing transformation and change.

Imagine that a client asks you to change the image of a facade, to expand a library or a museum, to extend a wing of a school, leaving space for your ideas and your vision.

Archihackers Competition 2019

ArchiHackers Competition is an annual event, a competition inspired by the major transformation projects that are taking place in contemporary urban contexts.

The reconsideration of a façade, an expansion on the existing, a new cover, the extension of a modern architecture, the revisiting of an interior. The possibility of giving a new image and enhancing your dream project.

To take part in the contest, you have to choose a reference architecture (modern or contemporary architecture interventions) and to imagine freely, without any fixed constraint, a transformation.

The transformation to propose is free-themed and, for instance, it can concern volume subtraction or addition, change of materials, new covering, as well as variation of the function.

Even the techniques of representation are free, with the possibility of using render, photomontages, illustrations, models, patterns and drawings of all kinds.

The ability to communicate the idea behind a creative process will be evaluated as presented in one single table project.

We provide here below iconic and inspiring images for the theme

This project is an example of an architecture stratified over time: starting from a historic building, it has then gone through two extensions in different periods.

what to produce

Not only the idea and quality of the project will be considered important, but also, the clearness and representation skills.

What to produce

The project must be presented with one table in **DIN-A3 (horizontal) format**.

The table must report exclusively the competition name and the application code > **Archihacker2019 - uniqueID** (the table itself must be named in the same way).

If the name of the team or its members, or any explicit reference appear so that it is possible to associate the project to the team or its members, the proposal will be banned without any possibility of refund.

The contents and the manner of representation of the table are under the complete responsibility and freedom of the team that can adopt any graphics tool to better present the project idea.

Not only the idea and the quality of the project will be considered as important, but also the clearness and the representation skills, so that the content is expressed at best. Short captions are also allowed but only in Italian or English, other languages will not be taken in consideration.

The table must be exclusively in Jpeg format and DIN-A3 (horizontal size), with a maximum weight of 3 Mb.

A 72 dpi resolution is suggested, but also bigger resolutions are allowed (as long as the file doesn't exceed 3 Mb).

In addition to the table you can also add further details about your project:

- cover (mandatory)
- description (mandatory)
- 2 images max 1Mb (optional)

**anyway just the A1 table will be evaluated in the contest*
