

2014 TAIPEI TECH INTERNATIONAL STUDENT [OCCUPATION] COMPETITION

THEME

This competition takes on an elemental perspective to architectural design and sustainability. The keyword of this year is "OCCUPATION". Occupation of public realm or private property, legally or illegally, unintentionally or on purpose, temporarily or permanently, is happening all over the world. Militarily, politically or spatially, evaluation and definition of "occupation" are open to participants' imaginations.

Participants are to revisit the ideas of occupation and produce creative proposals under consideration of sustainable issues. While the term "sustainable" is subjected to many dimensions: environmental, economic and social, participants are free to interpret in their own ways. The site chosen has to be real and its coordinate values have to be marked under the theme on submission boards. Spatial proposals with occupation statement and responsive design strategies are expected.

ORGANIZER

Department of Architecture, National Taipei University of Technology (Taipei Tech)

CO-ORGANIZERS

The Architecture Cultural & Educational Foundation of the National Taipei University of Technology
